

Claims

What is claimed is:

1. Improved Cleansing Brush comprising:
 - a cleansing head;
 - a first rigid elongate tubular body;
 - a second rigid elongate tubular body;
 - a joint portion;
 - a first resilient grip handle;
 - a second resilient grip handle;
 - said joint portion comprised of a first disk member and a second disk member;
 - said first disk member including an imbedded standard spring biased ball plunger assembly;
 - said second disk member including a plurality of radially displaced apertures capable of receiving said ball;
 - said first disk member having a centrally located aperture;
 - said second disk member having a centrally located threaded aperture;
 - said first and second disk members held together by a threaded screw;
 - said first elongate body attached at one end to said first joint member;
 - said second elongate body attached to one end of said second joint member;
 - said first elongate body terminating at its opposite end in said first grip

handle; and

said second elongate body including near its connection with said joint member a said second grip handle.

2. Improved Cleansing Brush as claimed in claim 1 wherein said second elongate member includes an aperture to removably receive a shaft portion of said cleansing head

said cleansing head shaft including a spring biased push button that can snap into said aperture in said second elongate member thereby removably retaining said cleansing head.

3. Improved Cleansing Brush as claimed in claim 1 further comprising a sponge type cleansing head.

4. Improved Cleansing Brush as claimed in claim 1 further comprising a brush type cleansing head.

5. Improved Cleansing Brush as claimed in claim 1 further comprising a cloth covered sponge type cleansing head.

6. Improved Cleansing Brush as claimed in claim 1 further comprising a nylon net type cleansing head.
